

Brachychiton populneus x discolor 'Griffith Pink'

GRIFFITH PINK BRACHYCHITON

Evergreen pyramid-shaped tree with densely packed panicles of pink flowers in late spring and early summer. The trunk is very large and has green-lobed foliage that creates a dense canopy. Offers slightly different foliage to other pink varieties such as 'Bella Donna' and 'Bella Pink'.

The form and colour of this magnificent Australian tree makes it suitable for many urban situations including commercial landscapes, streetscapes, schools, parks and golf courses. It is a very reliable shade tree in smaller gardens.

This tree prefers a sunny spot in a well drained soil. Prefers a low phosphorus native fertiliser.

Foliage Evergreen
Form Broad-domed
Mature Size 5-8 x 2-3m
Family Malvaceae
