

Cedrus atlantica 'glauca'

BLUE ATLAS CEDAR

This is a large evergreen conifer initially conical in shape, later developing a broad crown, with spreading branches bearing silvery blue-green needles and ovoid cones.

This ornamental tree needs space so it is good for larger gardens and parks. As a specimen tree it is a feature due to its colour. It is sometimes used as a substitute for Blue Spruce, as it is faster growing.

More tolerant of dry and hot conditions than most conifers in temperate climates. Suitable for large screens.
