

Tree	 <p>Agonis flexuosa WILLOW MYRTLE, WEEPING PEPPERMINT WILLOW</p>
Description	An attractive medium-sized tree with a pendular weeping habit. It has clusters of small white flowers that grow on the branches in between the leaves in spring and summer. Has nice long thin shiny leaves that hang from the drooping branches giving it an all-over similar appearance to a Willow tree.
Foliage	 Evergreen
Form	 Pendulous
Mature Size	10 x 5m
Uses	A great specimen plant or native alternative to a Willow tree. Great in streetscapes and parks and gardens.
Position & Soil	Full sun is best and works well on the coast in sandy soils. A very hardy tree that can tolerate a range of soil types and positions does prefer a moist, well drained soil.
Features	<ul style="list-style-type: none">  Medium  Evergreen  Pendulous  Avenue  Coastal  Group Planting  Informal Screening  Native  Specimen
Pot sizes in production	• 40cm/27L (1.2-1.5m)
