

Tree	 <p>Fagus sylvatica atropurpurea COPPER BEECH, PURPLE BEECH</p>
Description	<p>This is an impressive purple-foliage form of the European Beech. A large deciduous tree which makes an excellent shade tree, particularly ideal used as a specimen in larger parks and gardens where its size is best accommodated. This deciduous tree has smooth, grey bark and deep purple foliage which turns a coppery-red in autumn before falling. It has inconspicuous flowers followed by spiny bracts which encase the beechnuts.</p>
Foliage	<p> Deciduous</p>
Form	<p> Oval</p>
Mature Size	<p>13 x 9m</p>
Uses	<p>A great contrast tree for larger areas, parks and gardens.</p>
Position & Soil	<p>Prefers a moist, well drained acidic soil, but can tolerate a little dryness. Will not adapt to excessively wet or compacted soils.</p>
