

Tree	 <p>Ginkgo biloba MAIDENHAIR TREE</p>
Description	<p>This is a very slow growing and long-lived, deciduous tree with a large and elegant habit. Considered quite an ancient tree, it is known to have origins dating back to Jurassic times and is often referred to as a living fossil. Specimens exist in its native origin, China which are estimated to be over 1000 years old. It has unique, double-lobed, fan-shaped leaves with veins which spread from the stalk of the leaf. Short catkins are produced, followed by yellow fruit and the foliage is a rich green, which turns a golden yellow in autumn.</p>
Foliage	<p> Deciduous</p>
Form	<p> Horizontal Branching</p>
Mature Size	<p>12 x 5m</p>
Uses	<p>A fantastic feature tree in all gardens adding great colour in autumn. Can be used in parks and many landscapes. Leaves from this tree can be used for teas.</p>
