Tree	Gleditsia triacanthos var. inermis 'Ruby Lace' RED GOLDEN LOCUST
Description	This variety is a lovely feature tree with a broad, open, spreading canopy and fine weeping foliage that droops towards the ground. New growth emerges a ruby-red colour and changes to its usual bronze-green. Foliage turns yellow in autumn before falling.
Foliage	
Form	( Pendulous
Mature Size	8 x 6m
Uses	Excellent unusual specimen tree, with striking visual appearance.
Position & Soil	It is a hardy variety, reasonably fast growing and will tolerate some periods of dryness once established. Prefers a full to part sun position. Can tolerate a wide range of growing conditions. Tolerates air pollution and urban conditions. Ensure any shoots that develop under the graft point are removed cleanly and promptly.
