

Tree	 <p>Prunus armeniaca 'Newcastle' NEWCASTLE APRICOT</p>
Description	Newcastle produces a rounded, medium to large yellow-orange fruit with light green shoulders. Its flesh is orange, soft and juicy. It is an early harvest, free-stone variety that is self-fertile.
Foliage	 Deciduous
Form	 V-Shaped
Mature Size	5 x 3m
Uses	This variety produces a small yellow fruit used for drying, desserts, preserves and canning.
Position & Soil	Prefers a sunny position with well drained soil. Water in well and keep soil moist until tree is established. Fertilise and prune yearly to encourage new growth and fruit the following year. This heavy bearing tree may need thinning to ensure a good yield.
