Tree	Fyrus communis 'Beurre Bosc'
	BUERE BOSC FRUITING PEAR
Description	'Beurre Bosc' is an heirloom variety of pear first recorded in Europe in the early 1800's. It is a medium- sized deciduous fruiting tree with an upright, pyramidal habit. Fragrant white flowers are borne in spring, followed by elongated conical fruit which matures in mid to late autumn. The fruit is juicy and buttery with a slightly grainy texture and is distinguished by its cinnamon-brown, russetted flesh - an excellent variety perfect as a dessert pear.
Foliage	🛞 Deciduous
Form	Round
Mature Size	4 x 3m
Uses	This is a popular pear variety, useful for eating, preserving and cooking.
Position & Soil	Pears produce best in full sun, though they can also tolerate partial sun. They prefer light, rich soils with good drainage but will tolerate heavier, clay-rich soils.
