

Corymbia ficifolia 'Summer Beauty'

GRAFTED FLOWERING GUM

This is a stunning grafted flowering gum which produces masses of flowers in summer. Large glossy foliage is dark green in colour, highlighted by lighter green undersides. New growth emerges with a reddish tinge. Its flower colour is a beautiful, soft pink with a hint of apricot, produced over the summer months, followed by large gumnuts. Rich in nectar, this is a great bird attracting, small grafted tree.

A very good performer for big and small gardens adding lovely summer colour. Great for streetscapes and parks for native habitat.

This variety should do well in most areas of Australia as they will tolerate light frosts and drought.
