

Corymbia maculata 'ST1' Lowanna

COMPACT SPOTTED GUM

A special selection of Corymbia (syn. Eucalyptus), developed by and exclusive to Speciality Trees, from Sale in Victoria. This denser version of straight C. maculata, is smaller in height with distinctive feature bark. The spotted trunk is cream and grey. The foliage is dark green and it forms a dense canopy. It has small white flowers that are clustered together.

Great for streetscapes and all sized gardens due to its compact form. It is also used in parks and makes a great shade tree. Great habitat for native fauna.

Can grow in infertile soils and dry sites but can also tolerate most soil types but must be well drained. Prefers a full sun position. Drought tolerant once established.

Foliage Evergreen
Form Oval
Mature Size 10 x 7m
Family Myrtaceae
