

Dais cotinifolia

POMPOM TREE

An unusual small deciduous tree with neat semi-upright branches with pale to mid-green leaves. It is native to South Africa. In late spring into summer, it produces round clusters of lightly-fragranced pink star-shaped flowers, hence its common name of Pom Pom Tree. Note: this tree is evergreen in warmer climate such as Queensland.

Perfect for a location that requires a small unique ornamental tree, that is tough.

Prefers a full sun position in well-drained fertile loam. Will not cope for long periods without water. Prune branches after flowering has finished.

Foliage Deciduous

Form Oval

Mature Size 4 x 2-4m

Family Thymelaeaceae
