

Eucalyptus cinerea 'Silver Shadow'

ARGYLE APPLE, CANBERRA BLUE GUM

This is an attractive, low growing and compact native tree with beautiful silvery-blue foliage so desired in landscape design. It has rough fissured bark and delightful pendulous foliage. As a grafted tree relatively new to the market it has shown both compactness and consistency in performance via many years under trial.

With lovely silvery-blue foliage, this tree makes an ideal feature tree in a native-inspired garden or combined landscape where colour contrast is desirable.

Prefers a sunny position in a humus-rich soil.

Foliage Evergreen

Form Round

Mature Size 11 x 8m
