

Eucalyptus leucoxylon 'Euky Dwarf'

DWARF YELLOW GUM

A great choice where height restrictions are of concern, this shapely dwarf Eucalypt has a light, open canopy with a single trunk and smooth bark that sheds. Its grey-green leaves once mature are offset by masses of nectar-rich, pink, red and sometimes cream blossoms from late autumn to early summer, attracting native birds to the garden.

Due to its size it is great for small gardens and landscapes particularly in groups to create a bushland affect.

Prefers full sun or light shade in well-drained clay or sandy loams. Is tolerant of frost and coastal conditions.
