

Fraxinus americana

WHITE ASH, AMERICA ASH

This is a fast-growing, large deciduous tree with nice canopy suitable for a shade cover. Foliage is a combination of dark green on top of the leaf and lighter green underneath. In autumn, leaves turn a range of yellow, orange or bronze autumnal colours. The tree is oval-shaped when young, becoming more rounded with age, with upright spreading branches.

As a big tree, it is useful as a shade tree on larger properties or in parks and other open spaces.

Prefers a well-drained, humus-rich soil in full sun with some irrigation in hot weather. Water well until it is well established.
