

Nyssa sylvatica 'Red Red Wine'

TUPELO, SOUR GUM

This is a beautiful medium-size tree with a pyramidal to broad crown making it good for shade in summer. Young foliage starts out red but turns a glossy dark green when mature. In autumn, the foliage turns varying shades of deep red again depending on climate and aspect.

As a moderately sized tree with lovely autumn colour, Tupelo would make an excellent specimen planting in a larger garden or reserve.

This tree prefers humus-rich, free-draining soil in a full sun position.
