

Pittosporum tenuifolium 'Tasman Ruffles'

Native to New Zealand, this evergreen shrub has jade green foliage with pretty, ruffled edges, hence its name. The foliage contrasts beautifully with the dark reddish black stems and has an overall compact growth habit. A tidy, low maintenance variety predominantly used for hedging as it is easy to clip and maintain, but with the ability to grow to 3 metres tall, it also makes a great screen.

Most commonly used for hedging or screening due to its dense form.

Prefers a humus rich soil in a sunny position.
