

Prunus persica nucipersica 'Sunraycer'

SUNRAYCER NECTARINE (LOW-CHILL)

This variety is an early-season semi-clingstone. Fruit is sweet tasting, red-skinned with yellow flesh. This is a self-pollinating variety. 'Sunraycer' works well in both cold-temperate and sub-tropic areas as it requires low chill hours.

Great for eating fresh or used for jams and preserves.

Plant in a sunny position with well-drained and well-worked soil. Water in well and keep soil moist until the tree is established. Fertilise when planting and again after new growth appears. Prune the tree when planting to encourage new growth.

Foliage Deciduous

Form V-Shaped

Mature Size 4-6m x 3-4m
